About This Game

We all know we love snakes, right? Even if you afraid of snakes, u was in love by playing Snake game on your mobile phones while you was young. That game is nothing special but classic version of Snake with 3 modes:

Slug - mode for unhurriedly snake lovers. You can actually enjoy of every snake movement while watching. Also u can do your homework while Snake is moving. You wont lose, i tried. The mode is specify on novice players, or for people who are very patient.

Worm - medium role of a snake lovers. You would like to try it first, because as i said Slug is for very patient players.

Python - literally the mode for professional players with whole life of playing Snake. You wont try it if you are not.

I would not say that this is the best game in the world, but the original Snake was. So the reason the game is at steam, is to feel nostalgia, at least for a few minutes.

if you're looking for an interesting vr experience that looks amazing, I think it's worth checking out for the launch price.

Could have a ton of potential if they expanded into a full game.

like Mars VR. I put it in the "interesting demos that are worth checking out" category.

. This is the other piece of your mech collection. You're gonna have a rough time of heavy targets that come out in comparason to using the other two mechs missiles or big cannon, but it can get the job done still with patience. This machine however will chew up mediums and smalls well, and do it while providing the usual mech armor protection along the way.

With the fact that these mechs can be called down pretty fast makes them the ideal asset for combat situations. Mechs also automatically chunk stratagem balls at distance without the wait of charging up a throw.

Walk on little guys, bullets galore, and if it seems stiff at first, just give it an upgrade and swing those arms for faster response. Mechs can get squirly with their torso turns at first, but you learn how to make the most of them fast.

Again the fact you can call them down faster than most weapons or ammo makes them a good fast answer to changing conditions, and good protection for a bit of a haul. It's your firepower and protection on a near moment's notice.

Mechs, the good answer to most of your combative needs, but you need to get out of them occasionaly for objectives, pick ups, and you get only one per slot as you would expect. But their durability, functionality, and speedy delivery, make them well worth it.. A fun endless runner game, not as easy as I thought. I recommend buying when on sale.. NO SPOILERS.

What the others are saying rings true. I can not recommend it.

The end feels terribly rushed, and ends abruptly.

More than that, its designed to make you fail.

You will fail skill check after skill check, because the game DEMANDS it.

It is impossible to have such high values for so many parameters.

In the end, the game is rigged and your choices dont matter....

A shame, because i truly liked the first two parts.. Warning: This game will leave you with many unanswered questions. Many.

I hesitantly recommend this game because of the gaping holes in whatever concept of a storyline it seems to have, but if you are a fan of psychological thrillers, then you'd be a fan of this game.

Personally, I'd favor a more structured background of your situation in the game, but if you appreciate mystery more than I do the pieces of the big puzzle can be a thrill to assemble.

The games succeeds in two points: It's very eerie (a must have for games such as this), and its puzzles vary widely enough to stay interesting throughout the entire game. Whether it's mazes, lasers, shaped puzzles, item hunts, audio matchups, etc, every puzzle was simple yet complex enough to allow for the thrill and the (limited) storytelling in between.

I picked this game up on sale, and if you're looking for a quick thrill, I recommend you do too.. Well... The game name is honest.... NICE STORY

LANJUTKAN MZ. This game is certainly better than the first one. If you don't care about anything then get this game because it is full of pretty dumb insults which is what makes it amazing. Want to make fun of man-buns? Well don't worry because you can do that here! Want to be in the movie "Coming Soon This Summer 5: The Spinoff" (that title though) well then don't worry, because this game has it!

11/10 would play again... also the intro killed my ears. This is one of these games that, when i was younger, it blew my mind

with how cool it looked. It's a great game and if i ever have kids, this is one the games ill show them.

This is an older tower defense game. The enemy pathways are very short, and the maps quite small. The graphics are above average for a tower defense game, it doesn't seem to be tablet ported, which is a big plus.

The gameplay itself is the problem, it's almost more of a clicker than a proper tower defense game. There's not much in the way of interesting choices or strategy. Comparing the mediocre gameplay with the extremely optimistic \$15 price tag, I can't recommend this. Maybe if it was much cheaper and better tower defense games didn't exist.. WHERE IS THE THIRD RADIO PART?????. A small collection of tiny fables. This is honestly gonna be one of my favourite titles. It's short but sweet, and the stories are not only relateable, but a glimmer of hope and a reminder of the beauty of the soul. The artstyle is lively and colourful and the music as great as always, and everything is very easy to navigate. I absolutely loved this.. so i start it and end up running around this building forever! nothing going on, no instructions nothing! i have a guy chasing me wit ha gun a guy chasing me wit ha bat and a horde of zombies trying to eat me!

WHY?! what is going on here?! nothing is making sense and I can not escape this building... or so I thought. I jump out of a window i fall to the ground expecting to be free or at least to die or something and guess what?! i fall throw the damn floor and i'm falling, falling and falling I see nothing but blackness, and i'm sitting here wondering... what just happened?

for now, give it a miss and wait till it's atleast 5% complete. Death's Hangover is an enjoyable brick breaker clone with a lot of diversity and things that kill the doldrums of the genre. Rather than breaking all the blocks or barrels in this case, you either need to break through a wide exit gate at the other side of the screen and then exit. This makes a "break-through" rather than a brick breaker. There are bosses, blocks, tricks and traps that get in the way. It's a simple game, as most block breakers are, but it's a fun game enhanced with arcade quality sound effects that add some punch to everything.

Two girls wake up in a dungeon after what I assume is a night of drinking and must now escape a castle or kill Dracula. There's a story, but a lot of it, I button mashed my way through. So one girl hops in a metal ball while the other girl controls the paddle at the bottom of the screen. I assume when one dies, they both perish.

You can only move left and right while dodging projectiles and enemies. Killing enemies results in bloody green or red goo that's a visual treat. Maneuvering around projectiles while keeping your ball out of the pit becomes the big issue. Most enemies move forward, but later on they get more challenging. Some enemies shoot, others head toward you at a slow pace, while others hide behind shields and bounce the ball back at you. This diversity keeps the game fun and engaging.

The game has several themed areas as you crawl up a castle. Each area has several rooms that go by quick since you only need to bash the exit and move your ball through. Some rooms feel as if their only purpose is to collect power-ups and souls for later. Bosses are frequent as are enemy rooms where you need to slaughter X amount of enemies before you can break through the gate. Still other rooms feel more typical with a twist. Typical barrels block the path while other times there are moving or shifting blocks to get in the way.

As for themes, you start in the dungeon, get to the sewer where water lanes act conveyor belts for your ball, get to an arena where the fans riot and pile into the screen and even reach a point where the side walls that secure you into a lane can break away. Each area has its own enemies and dreary look. There is a limited, dark castle dungeon-esque color scheme that may turn away some, but the game's charm and fun makes up for it.

Breaking barrels has a chance to release an item such as multi-ball that breaks your single ball into three, a double dart gun, a fireball and a bomb that will destroy anything in its radius. Once you have a power-up or weapon you can fire at will. Since the object is to get your ball out the door, multi-balls will only go with you, if you get them to the exit.

Along the way, you'll also find souls. These are optional collectables, that have a big impact on game overs. With a soul, you can use them to gamble on a big wheel for prizes like extra lives. It's a nice frill to keep you in game. When you think you've lost, here are more lives.

While you're on your journey, you'll have a reaper guiding you with brief lines of dialog as a hint for each new level. Between areas of the castle, you'll see silly dialog between the blonde working the paddle and the drunk dullard forced to be in the ball. While the dialog seems unnecessary in a genre like this, it does add to the fun and charm.

With the robust sounds, dreary colors, quirky comedy, quick levels, it makes this game feel like an addictive arcade game from a different era. For the cheap price, it's worth the hand full of quarters.. A.R.E.S is a fun side-scrolling platformer, kinda like Megaman games (the first thing it made me thought of). It provided some decent challenge (at least if you play on Hard difficulty) and the storyline was a pass. You unlock 4 weapons throughout the game which you can upgrade into stronger versions, 5 levels each with its own boss, so the whole game was fairly short and could be finished within 3-4 hours. Although, there is a lot of replayability value if you want to upgrade all your weapons, find all the secrets and get perfect SS score on each level, and other things that are listed in the achievements.

For \$5, I'd say the game wasn't bad and definitely worth trying. However, I do want to point out that there is a similar game called A.R.E.S: Extinction Agenda EX which is available for \$5 extra (if you already own this game) and is apparently an improved version of this game with more content. I haven't got to play the EX version yet, but I'd say that this game has at least earned my recommendation.
